Mitutoyo SPC, U-Wave & Surface Finish Seminars

April 20 and April 22, marked the first set of Mitutoyo Metrology Seminars being hosted by Thomas Skinner during 2010. Taking place at our Vancouver branch and our Winnipeg branch, 60 of our customers came to:

- Compare the differences between SPC and Data Collection
- Learn about Mitutoyo's U-Wave Wireless Data Communication System, including Measurlink Real-Time+ and Measurlink Process Analyzer
- Watch an in-depth presentation on Surface Finish, skid and non skid method
- See the new SJ-210 Surfrest

Jeff Hamelin, SSG (Sales Support Group) out of Montreal, Quebec, demonstrating Mitutoyo's new SJ-210 Surfrest at our Winnipeg seminars.

Barbara Jarosiewicz of Cormer Group Industries in Winnipeg MB, was very pleased after attending our Winnipeg seminar. "Your recent seminar was presented so well that it has inspired my interest to learn more about the Mitutoyo calibration tools that Thomas Skinner provides our company" said Barbara. "Everything to know about the Science of Measurement such as measurement standards, small tools and measuring instruments can be found in the Mitutoyo Metrology Handbook. The technical specification questions that I encounter on the job have been easily answered by Len Wheeler, Thomas Skinner Salesperson, and your excellent customer service [team]. Thank you for your great hospitality and the opportunity to realize all that can be learned through Mitutoyo and Thomas Skinner".

Marc Lafleur of Flowers CNC Machining Ltd. in Port Coquitlam BC purchased Mitutoyo's new U-Wave System after attending the Vancouver seminar. "The Mitutoyo SPC System has made quality control and data collection an easier, more reliable, and more efficient process" said Marc. "We are able to inspect, document, and print reports for customer's components, all while the parts are being machined. Thanks to Thomas Skinner for hosting the seminar that opened our eyes to this new incredible technology."

The next set of Mitutoyo Metrology Seminars will take place on September 28 at our Calgary branch and on September 30 at our Edmonton branch. Seminar times will be posted on our website (www.thomasskinner.com) as soon as possible.
