The Modern Art of Milling Event

To Thomas Skinner and Sandvik Coromant, milling isn't just about making a part, it's about making art. With the right tools, the machinist is not just a machinist, but an artist. From quick and simple to delicate and complex, Sandvik is dedicated to creating what you need to excel at the art of milling.

"We were please to have Sandvik join us again" said Don Babineau, VP of Operations, Thomas Skinner. "The Sandvik seminars are extremely informative to our customers. Sandvik's high quality tooling helps our customers create higher quality parts, faster and more cost effectively. We look forward to hosting these and more seminars again."

Our 2010 Sandvik Modern Art of Milling seminars took place at our Vancouver branch (May 4) and our Calgary branch (May 18). Almost 100 of our customers came to learn about Sandvik's most modern programming techniques, how to utilize the latest tooling technology, and how to become more cost efficient than ever. Guests were treated to live machining demonstrations using the milling techniques discussed.

"Our guests were enthusiastic" said Bill Haywood, Vancouver Island Territory Manager, Thomas Skinner. "Everyone left with new ideas and knowledge. It was a great seminar, my compliments and thanks to the Sandvik guys."

Don Wilson (Sandvik Coromant) giving presentation at our Calgary branch.

A Haas VF-3SS Super Speed Vertical Machining Centre was used for the live machining demonstration in Vancouver.
