# CoroDrill® DS20

What  
innovation  
looks like

**After years of R&D and customer testing, we are convinced...  
CoroDrill® DS20 is truly the best indexable short hole drill on the market.**

The concept consists of new designs for both drill body and inserts. It offers superior reliability and predictability with outstanding penetration rates for your 4–7×DC drilling operations. CoroDrill® DS20 is the first indexable drill to reach hole depths up to 7×DC – with no need for pilot drilling – reducing your cycle time and cost per hole.

Discover the new benchmark for indexable drilling.
