

COBOTS

Get Automated!

Collaborative Robots

Cobots have transformed traditional understanding of automation, and they're growing in popularity. They can create a plethora of opportunities for manufacturers of all sizes.

**UNIVERSAL
ROBOTS**

**productive
robotics™**

ADVANTAGES

- **MOBILE & EASY TO USE**

Designed to be mobile and easy to reprogram to run different tasks offering flexibility and potential for deployment throughout your facility

- **AUTOMATES REPETITIVE TASKS**

Operators can focus on higher value tasks that mitigate monotony and risk of injury

- **NO CAGE REQUIRED**

Integrated safety features make it possible for humans and Cobots to share the same work area. Cobots also take up less floor space than other automation options.

- **COSTS**

Enjoy the benefits of automation without making a huge capital outlay. Cobots make it possible for companies of all sizes to adopt robot technologies

- **UPDATE YOUR FACILITY**

Because of their many communication protocols and compact design, Cobots are the best option when retrofitting a robot to a legacy CNC machine

IS A ROBOTIC MACHINE TENDING SYSTEM A GOOD FIT FOR YOUR SHOP?

SYNC ROBOTICS

Industrial robots can increase safety, productivity and efficiency, at every stage of production. Modern industrial robots can automate entire parts of the production process from material loading at the front end to palletizing robots when the product is ready to ship.

Working with Sync Robotics

Thomas Skinner has partnered with Sync Robotics. We will work with you to review system requirements to find a robotic application, develop, integrate, install and service robotic systems that will achieve each your unique goals for savings, productivity, and quality.

Are you interested in finding more about what adding a robot to your workforce can do for your business?

Whether you're beginning your journey or ready for the next step, we are here for you.
